

MCC school students get a hang of astronomy

NT Bureau

Thursday, 23 June 2016

MCC students at a session on astronomy held yesterday.

Chennai Students of Madras Christian College Higher Secondary School were all eyes and ears as experts from Space Technology and Education Pvt Ltd explained astronomical terms and methodology to find the earth's circumference using 'Eratosthenes' method.

Space Technology conducted the event at MCC HSS as part of 'Project Paridhi' to create awareness on astronomy among students.

According to S Venkata Narayanan, South Zonal business manager, SPACE, "I am happy to see the great response from the students at MCC HSS."

MCC HSS principal Revathy Bonnes, said such events motivated students to involve in this activity and learn science hands-on.

The school's physics teacher Daniel Prem Ananth said, "The activity- based learning opened up new gates for students to explore many new scientific aspects in their studies."
