The SPACE programme at Indraprastha World School, Paschim Vihar, New Delhi is a unique model that introduces students to an enthralling world of Astronomy and Space Sciences through activities, experiments, games and quizzes. Students are not browbeaten into cramming facts and figures to prove their academic acumen. Instead, they are encouraged to ask questions and apply their reasoning to de-mystify scientific phenomenon. It also builds scientific temperament among the students and enhances their ability of reasoning and critical thinking. This approach not only makes them more confident in handling science problems, but also in handling real life issues. It also makes science pure fun! This Program bridges the gap between Innovation, Education and Evolution.
