Chennai, Dec 19:

A regional conference on 'Science and Technology for National Development' was held at the SRM University in association with The Indian Science Congress Association. Close to 450 students of Vidya Mandir Estancia and SBOA school and Junior college took part during the event.

According to a press release, SPACE conducted an air rocketry workshop during the conference as

part of Rural Education Achievement Program (REAP).

The workshop was aimed at developing hands-on learning as it stimulated one to learn science, astronomy and other subjects through experimentation, practical application and fun activities.

'Excellent exposure to the young minds ignited their curiosity to learn through experiments. One of the best workshops we attended so far', said Sujatha Arun, a participating teacher from SBOA School.
