

The SPACE classroom programme as well as the Astronomy Club have elicited a rousing response from our students and are cruising well on track to achieve the purpose intended. The initiative has infused in our children great interest and inquisitiveness for space sciences, besides opening young minds to the exciting possibility of venturing beyond conventional subjects and careers. SPACE promotes in students, the spirit of exploration and experimentation, a characteristic which will hold them in good stead when the time comes for them to stand out in a crowd.
